Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Commence	10/587,380	HANSON ET AL.				
Office Action Summary	Examiner	Art Unit				
	John P. Lacyk	3735				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Application/Control Number: 10/587,380 Page 2

Art Unit: 3735

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18 and 23-25 are rejected under 35 U.S.C. 112, second paragraph, as

being indefinite for failing to particularly point out and distinctly claim the subject matter

which applicant regards as the invention.

In claim 1 it is unclear what the claimed elements are, lines 1-2 state an inner ear

stimulation prosthesis including..., while line 3 states comprising..., making it unclear

whether the elements between the two are intended to be positively claimed elements

of the device or jus for use with such elements. The claims should be corrected to

clearly indicate what the positively claimed elements are. Claims 24-25 fail to further

define any structural limitations of the device and are merely directed to the intended

use of the device.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.

Application/Control Number: 10/587,380 Page 3

Art Unit: 3735

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

While this appears to be a literal translation from a foreign and/or International application, it appears that the proper headings are missing from the specification.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-4, 8, 15 and 24-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Neukermans (WO 97/30565).

Neukermans discloses an inner ear stimulation prosthesis having an implantable portion in the form of a rod (32) capable of transmitting vibrations, generated by excitation means to the semicircular canal of the patient's inner ear (see page 5, lines 4-18, page 24, lines 27-36 and page 27, line 3-page 28, line 32). With respect to claims 24-25 these are directed to the intended use of the device and therefore provide no further structural limitations of the device and as such the device would clearly be capable of being used in such a manner.

Application/Control Number: 10/587,380 Page 4

Art Unit: 3735

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 5-7, 9-14, 16-18 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neukermans.

With respect to claims 5-7, 9 and 23 these are directed to obvious variations that are known in the art, such that a modification of Neukermans to include such would have been obvious to one skilled in the art. With respect to claim 5, while Neukermans does not specifically teach a flattened shape, the courts have shown that to modify the shape of a device is an obvious expedient in the art, further one would be motivated to provide a flattened shape since this would allow for more surface area of the device to contact the body and thereby provide a better transfer of the vibrations. Further to provide certain sizes or shapes and to allow for the device to pivot would have been obvious since everyone is a different size and/or shape and this would allow the device to be modified to any size or shape in order for the device to be used on many different people. Also this would allow for slight movement of the device as the person moves or twists their head and/or neck. With respect to claims 10-14, 17-18 it is well known for such devices to be either wholly or partially implanted within the person and that devices that are partially implanted have external casings or housings and are held onto the user in many different ways.

Art Unit: 3735

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to John P. Lacyk whose telephone number is 571-272-

4728. The examiner can normally be reached on Mon-Fri, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Chuck Marmor, II can be reached on 571-272-4730. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
